

#### Task:

- Make a new Next.js app (read the learn section on next.js website it's very short)
- Install Material UI styles
- Make 3 steps reservation process, each step in a new page.
- Step 1: select checkin checkout datetime.
  - Checkout time must be bigger than checkin
  - Checkin can be only in the next 2 hours (from current time and not sooner)
  - The total time of booking must be more than 4 hours
- Step 2: select address from google API places (make a free account in google map addresses
  - <https://developers.google.com/maps/documentation/javascript/places-autocomplete>
- Step 3: Show the summary of reservation: dates, place details and a map of google with the address as MARKER

#### Requirements:

1. **Typescript** and latest ECMA
2. We need to get 100% score in Lighthouse <https://developers.google.com/web/tools/lighthouse>
3. Use Formik for forms in the steps (validation with Yup)
4. Use redux hooks
5. Use **custom theme** with material ui
6. Use date-fns
7. After you finish, add "redux-persist" to the form
